DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-5 and 24 in the reply filed on 7/24/08 is acknowledged.

Claim Objections

Claim 5 is objected to because of the following informalities: Misspelling of the unit "µm" at the last line of claim 5. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Mizuno (JP 07-232312). Mizuno discloses enhancing the strength of sanitary pottery by adding a raw material powder, alumina powder, having an average particle diameter of 1-4 µm. (See claim 1 of Mizuno). The water content of the raw material is 25% by weight. (See Paragraph 23). The raw material is then casted to form the sanitary pottery. It is this casted raw material composition that is deemed as the claimed "agglomerates of a raw material" because the raw material is compacted and shaped into a sanitary pottery. In regards to the claimed water content, as the casted raw material is dried and calcined to a water content of zero from an initial water content of

Art Unit: 1791

25% (see claim 1 of Mizuno), it crosses the claimed water content of 3-7%, 15-25% and 0-9%.
